Cabell Confirms Russian Intent

If you want the latest inside information on what the Russians are up to, note the remarks by Gen. C. P. Cabell to the Tarrant County Medical Society at Fort Worth. The deputy director of our Central Intelligence Agency says the Soviets are as dead set as ever on promoting world revolution; the only question is when, where and how they will strike.

CABELL

This should end the fuzzy thinking by many Americans who believe we can let down our military guard in favor of some understanding or agreement with the Communist conspirators. We are faced by the greatest threat of military aggression in our history. Khrushchev is as firmly seated in the saddle as ever.

It is idle to think that consumer pressure in the U.S.S.R. can alter the course or that the masses have any chance of overthrowing the dictatorship.

It is clear that the slightest display of weakness on our part would be fatal. For all of Moscow's talk about peaceful coexistence, they are deterred solely by their present lack of military superiority over us. Let's keep it that way.
